	Personnel	
7.	The name of the manager is not known. There were about 400 employees consisting chiefly of Soviets, the remainder being German PWs. Work was carried out in one shift.	
	Security Measures	
8.	The factory is surrounded by a high brick wall. There are no watchtowers. Inside the factory there is a civilian guard, and at the entrance there is a double guard consisting of civilians and MVD. Passes are checked at the entrance.	
v.	Wages, Prices of Food, and Living Conditions	
9.	PWs earned 700 rubles per month, of which 425 rubles was taken by the camp authorities and the remainder paid in cash to the PWs.	
10.	Prices in the camp canteen were as follows:	
	1 kg of black bread 3.60 rubles 500 grams of white bread 3.50 rubles 1 kg of butter 60 rubles 1 kg of margarine 40 rubles 1 liter of sunflower oil 120 rubles	
11.	Practically all the workers, both Soviets and German PWs, complained of the poor living conditions. Pay was small and insufficient to purchase necessities. Leisure periods were practically nonexistent, as evenings were taken up with meetings, political training, and lectures at which the poor conditions prevailing in the Westwere emphasized. This was not believed by the Soviet workers, who spoke bitterly about party officials.	
	Plan of the Factory	
12.	The factory site is quadrilateral in shape and covers an area of over 200 x 100 meters. The buildings are of brick and concrete. The key to Sketch No. 2 is as follows:	
1. \$	1) Two-story administration building. 2) Two-story building. Soviet officials and German engineers occupy the upper story, and the ground floor is used as offices. 3) A solid single-story building.	
	(7) Workshop about 30 meters in length. In one were tanks and aircraft wings which had been covered with rubber produced in the factory.	
10), 12),	13) One-story buildings about 40 meters in length. 14) Russian gauge line with two ramps.	
	tanks of various sizes which were taken away after under- going tests few complete aircraft but many aircraft wings of different sizes and construction. 16) A tall building of reinforced concrete containing a rifle range about 200 meters long and more than 20 meters wide. The roof was composed of sections of reinforced concrete arranged in such a way as to pre-	0X1-HUM 0X1-HUM
	vent bullets from leaving the building and at the same time admitting light. In this building tanks and aircraft which had been covered with rubber were fired on from different ranges by rifles and MGs. The wings of the aircraft came in for special attention.	0X1-HUM
